1.0 Introduction

There are occasions when as an organisation we would like to take photographs of our activities at the nursery and stay & play grps, and Festivals, to enable us to publicise our activities properly giving, for example, prospective parents and funding organisations a feel for what occurs.

The use of pictures is in some instances far more effective than just written text. In order to present to others how beautiful our groups are there is no better way than to see actual photos of the people, children and environment we have the good fortune to work with.

The nursery aims to keep all children within its care safe. This includes raising awareness of potential danger through the taking of, and/or distributing of, photographs or moving images.

Mobile phones should be used only as a safety element during the nursery day; members of staff should not be texting, emailing or on social media during their working day. To do so is a disciplinary offence and will be dealt with accordingly.

Any visitors to the setting must also observe the same policy, this includes parents, prospective parents and contractors.

Any staff member who sees a person using a phone inappropriately must immediately ask them to stop and/or leave the setting.

Photographs taken by staff will be solely used for publicity.
